Dear Parents and Caregivers,

Thank you to all the teachers who organised and accompanied our students to swimming lessons. Every swimmer has made progress. Now it is up to you as parents and caregivers to keep their swimming skills going with lots of practice.

Tomorrow is our Presentation Day. It will begin at 10am under the Primary COLA. The students who have worked hard and attended school every day will be acknowledged for their work. Our 2016 school leaders will also be announced. All students are to be in full school uniform.

Tomorrow evening will be the Year 6 Farewell. This is a special dinner that they are all looking forward to. Year 5 will join them after the dinner in the hall. Students must have their Gold Card to attend.

2015 School Reports will go home on Friday. Please celebrate your child’s successes with them.

School finishes for all students on Wednesday 16th December. School resumes for all students on Thursday 28th January. All our 2016 Kindergarten children will receive letters with their times.

Have a great week.

**Impetigo**
(School sores)

**Symptoms**
Small red spots change into blisters that fill up with pus and become crusted; usually on the face, hands or scalp.

**School or home?**
Keep home from school until antibiotic treatment starts. Sores should be covered with watertight dressings.

**How can I help prevent spread?**
Parents of children who may have had contact with impetigo should look for signs of infection and seek treatment if symptoms develop.

Careful hand washing especially after changing dressings. Avoid sharing toilet articles, towels, clothing or bed linen.

Consider using anti-bacterial soap for bathing for two to three weeks. Avoid scratching or touching the lesions to prevent spread to other parts of the body.

Completing the recommended antibiotic course is very important.

**Head Lice Alert**

Please carefully check your child’s hair tonight. The easiest and most effective way to find head lice are to follow these weekly steps.

**Step 1:** Comb hair conditioner on the dry, brushed (detangled) hair. This makes it difficult for lice to grip the hair or run around.

**Step 2:** Wipe the conditioner from the comb onto paper towel or tissue.

**Step 3:** Look on the tissue and on the comb for lice and eggs.

**Step 4:** Repeat the combing for every part of the head at least four or five times.

**Step 5:** If lice or eggs are found, the person should be treated.
